To: DWR IRWM Grants@DWR <dwr\_irwm@water.ca.gov>;

Cc: Carrie Pollard <Carrie.Pollard@scwa.ca.gov>; Joan Hultberg <Joan.Hultberg@scwa.ca.gov>;

After discussing our questions with DWR, the Water Agency prefers Option 2 (provide additional funding directly to grantees to carry out the necessary monitoring).

Sincerely,

Mollie

**Subject:** Water-Energy Grant Program Public Comments from Sonoma County Water Agency

To Whom It May Concern,

In order to best comment on the two options for project monitoring, we are requesting DWR to answer the following questions:

- 1) Please clarify what kind of data will be collected for your baseline. Will it be water/energy usage for the entire facility, or will it be down to the fixture, which will require sub metering? If it's down to the fixture, who will purchase the sub meters, and who will read the sub meters (this was not factored into our grant application budget)?
- 2) What level of detail are you looking for in the post-project monitoring?

Sincerely,

Mollie Asay, CDT
